- Find instead of searching: all your data, all your machines, all your original parts at a glance**
- Convenient order management with order history going back 5 years**
- Quick finder functions with one-click buttons for favourites and current Saurer offers**

All data ...

Secos 2.0 is a modern, modular web portal. It can be used from almost any PC, tablet or smart device. Technical information on all Saurer machines is stored in the database.

My Account

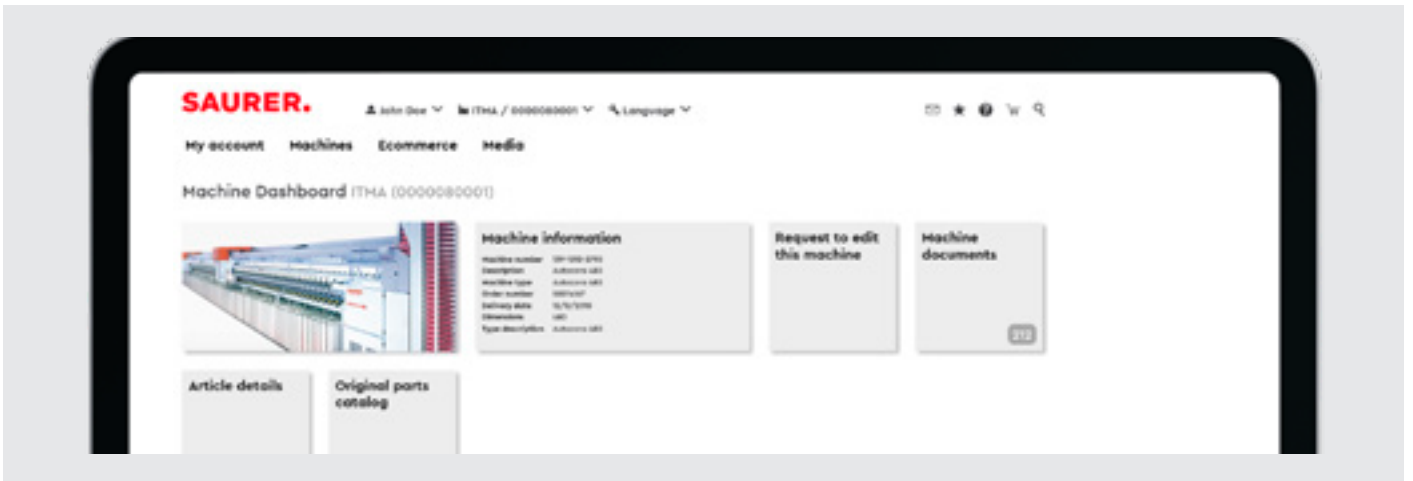

From here you have quick and clear access to all relevant machine information for you and your company.

From here you can access the original parts shop, which is organised according to your individual needs.

My Dashboard

Here you will find an overview of the data stored for you and your company and your contacts.

You have instant access to the latest product information. You receive an overview of all your Saurer machines and you are able to access the information on these machines without complications.

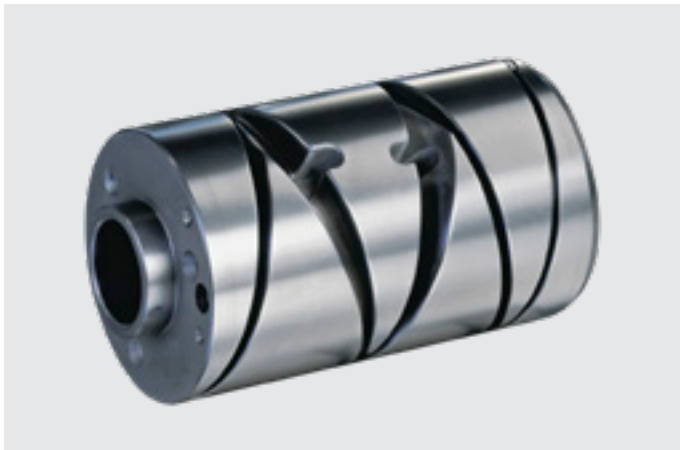

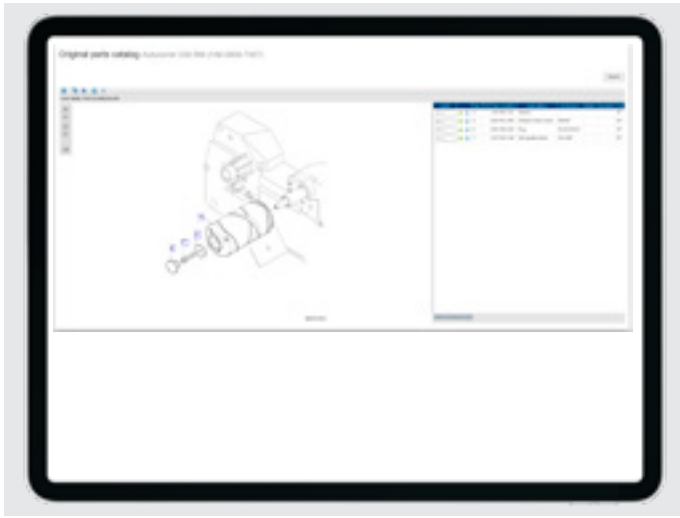

... to your machines.

Machine Dashboard

All your machines are presented here with the relevant information. This allows you to access all the data assigned to this machine and the updates and upgrades that have taken place. This gives you a complete overview of each of your Saurer machines, the individual manuals and configuration levels as well as access to the original parts catalogues. The fully documented machine history, the documents and suggestions for optimisations can also simply be called up at the click of a mouse.

This means you are always up to date and can react precisely to every situation. Whether in the office, in production or on the road.

All original parts for your needs.

You have several Saurer machines from different series, production data and expansion stages. How do you ensure that you always get precisely the original part you really need? How can you plan your maintenance optimally? With Secos 2.0!

Secos 2.0 makes purchasing easier by assigning original parts catalogues to individual machines. With Secos 2.0, it could not be easier to identify the required part using intuitive visual support. Secos 2.0 does not keep you waiting, because you always have an overview of the warehouse and shipping status.

Online original parts catalogues

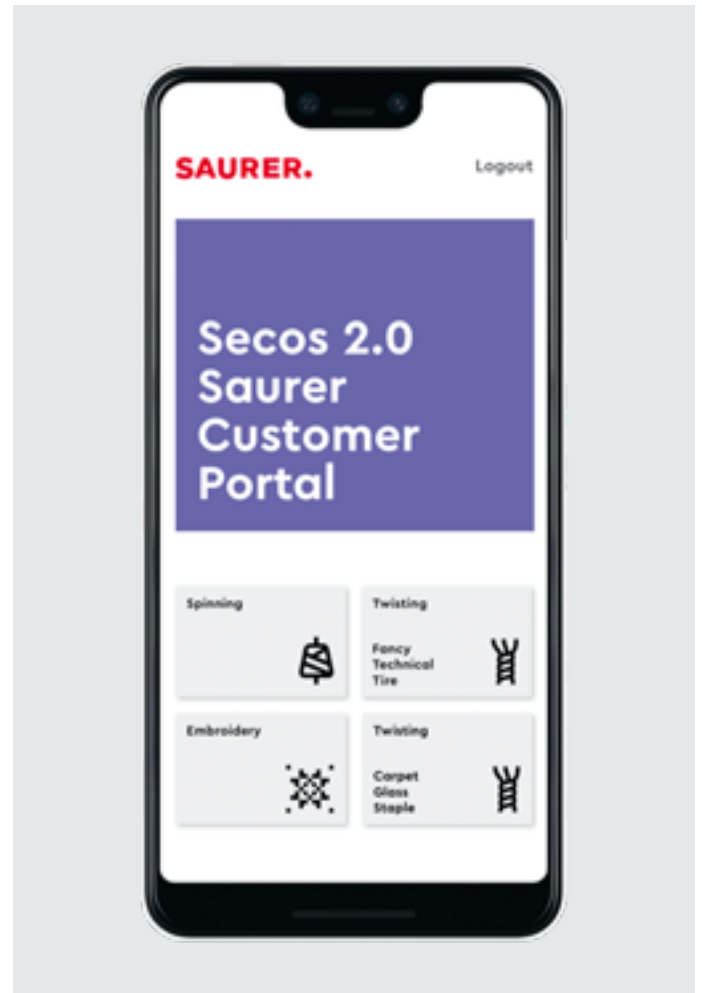

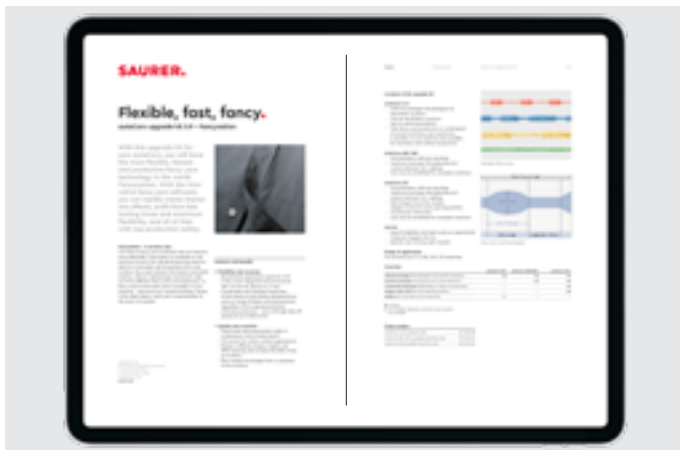

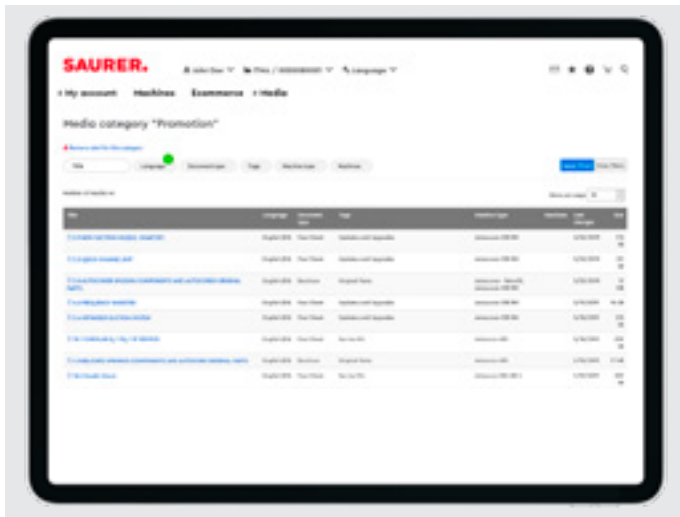

The original spare parts catalogues, individually prepared for your machines, allow you to plan the purchase and use of the ordered parts.

Complete order history

In addition to structuring the shop according to assemblies, access to the order history facilitates purchasing and cost control. Inventory and shipping tracking are displayed in real time so you know when you will be getting what you need.

Advantages of the Secos 2.0 shop:

- Convenient shopping
- Secure processing
- Optimal plannability

All information for your future.

Saurer machines are designed and engineered for a long, productive life. However, the results from research and development are not the exclusive preserve of new machines. Even with existing installations, upgrades and updates can optimise performance and quality for many years to come.

Secos 2.0 gives you an overview.

Secos 2.0 provides easy access to information – especially options for your machines.

Selected offers

The needs of each customer vary according to different installations, markets and raw materials. This results in individual and varied options for the renewal and expansion of each machine. Secos 2.0 gives you an overview of all the options that secure your investment in the long term.

Always up to date

Secos 2.0 provides you with expert knowledge of your requirements and ensures that you are always among the first to know about updates and upgrades.

Advantages for Secos 2.0 media users:

- Modernization of machines
- Sustainability
- Investment security
